Professional Experience

Forest Creek Capital LLC

Dallas, TX

Quantitative Research Analyst — Energy Markets

Jun 2020 – Present

- Joined as a new graduate hire and progressed to owning live trading desks with end-to-end responsibility for strategy development, deployment, risk management, and P&L.
- Generated **\$16M+ in cumulative trading profits**, with strategies delivering **>2× return on collateral on average, consistently over 5+ years**.
- Designed and deployed production-grade quantitative strategies with a robust, iterative research process emphasizing consistent profitability, capital efficiency, and regime stability.
- Led development of a **core, optimized Python research and trading library** over 4+ years, forming the foundation of the firm's platform and used daily by hundreds of production and research scripts.
- Built portfolio construction, pricing, and risk models using constrained optimization, statistical methods, and machine learning, evaluated across CVaR₅, return on VaR₅, worst-case return, and drawdown behavior.
- Modernized the research and production stack by integrating **GenAI / LLM tools** (including V1 MCP servers) and leading a **large-scale software systems migration** spanning 8+ years of evolution with minimal disruption to live trading.
- Developed and operated cloud-native infrastructure on **GCP** (BigQuery, Airflow Composer, Kubernetes, VM management), and led a backup and disaster recovery initiative resulting in a clear, repeatable system recreation playbook.
- Partnered with firm leadership on trading decisions while mentoring junior analysts.

Internships & Research Experience

Uber Technologies Inc.

San Francisco, CA

Engineering Intern, New Mobility Division

2019

- Built Embedded Linux software for IoT-enabled JUMP e-bikes and analyzed large-scale GPS datasets to define accuracy standards.
- Developed a fleet operations cost model projected to save approximately **\$60M annually**.

Washington University in St. Louis

St. Louis, MO

Research Intern, Dept. of Energy & Chemical Engineering

2017

Ran simulations on HPC clusters; optimized pipelines and received a fully funded Ph.D. offer.

Education

University of Illinois at Urbana-Champaign (UIUC)

GPA: 3.9 / 4

Master of Computer Science

2023

University of Illinois at Urbana-Champaign (UIUC)

GPA: 3.9 / 4

Master of Science, Mechanical Engineering

2020

Fully funded by Teaching and Research Assistantships

Indian Institute of Technology (IIT) Bombay

GPA: 9.3 / 10 (Top 5%)

B.Tech., Mechanical Engineering & Computer Science

2018

Skills

- **Programming:** Python (Pandas, NumPy, PyTorch), SQL, MATLAB, Jupyter, C++, PHP
- **Quantitative:** Optimization, Statistical Modeling, Machine Learning, Risk Management, Backtesting, CFA Level I
- **Infrastructure:** GCP (Airflow Composer, BigQuery, CloudSQL, Kubernetes), Linux, Git
